

CHAITANYA GOEL

FRONT - END DEVELOPER

PROFILE

Aspiring Front-End Developer with a strong foundation in web development technologies and a passion for creating dynamic, user-friendly websites and applications. Currently pursuing further training in front-end development to enhance skills in modern frameworks like React, HTML, CSS, and JavaScript. Eager to apply my knowledge and grow in a professional development environment.

MY PROJECTS

- Food Restaurant Website (HTML)
- A clean, responsive website for a food restaurant built with HTML, featuring a user-friendly layout with menu items and contact details. Designed to work seamlessly across different screen sizes.
- Travel Blog (HTML & CSS Grid)
- A visually appealing travel blog website created using HTML and CSS Grid. It offers a modern, flexible layout that adapts to different devices, showcasing travel stories and images.
- Multipage Website (Bootstrap)
- A multipage responsive website built with the Bootstrap framework. Incorporates Bootstrap components like navigation bars, cards, and modals to create an engaging, interactive user experience.
- Calculator App (React)
- A simple yet functional calculator app built using React. Features real-time calculation with an intuitive interface and responsive design for smooth user interaction.
- Weather App (React)
- A weather application built with React, fetching real-time weather data from an API. Features dynamic UI updates, showing current conditions, forecasts, and weather details in an easy-to-read format.
- Landing Page (React)
- A sleek and responsive landing page created with React, designed to capture user attention. Includes interactive elements like forms, buttons, and animations to enhance user engagement.
- Tic-Tac-Toe Game (React)
- A fun, interactive Tic-Tac-Toe game built using React. Features real-time game updates, player turns, and a simple, intuitive interface for an enjoyable gaming experience.
- E-Commerce Website (React)
- A fully functional e-commerce website developed with React, featuring product listings, a shopping cart, and a checkout process. Integrated with state management for dynamic updates and seamless navigation.
